

Aswin Salish

Computer Science & Engineering Student | Full-Stack Developer | AI Enthusiast

Location: Porathissery, Kerala, India **Email:** aswin25cs@cce.edu.in **Portfolio:** aswinsalish.me

PROFESSIONAL PROFILE

A dedicated and innovative Computer Science student with a comprehensive background in full-stack web development, artificial intelligence implementation, and systems architecture. Adept at conceptualizing and deploying functional prototypes and MVPs, with a proven track record of leveraging modern frameworks, API integrations, and cloud databases. Deeply engaged in continuous academic development through specialized technical coursework and active participation in regional hackathons and project expos.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Ongoing

Christ College of Engineering, Kerala, India

- **Current Status:** Completed First Semester End Semester Examinations (December 2025).
- **Core Focus:** Logic formulation, algorithm design, data structures, and foundational computer science principles.

TECHNICAL PROFICIENCIES

- **Programming & Scripting Languages:** C, MATLAB.
- **Web Development & Architecture:** Full-Stack Development, Backend schema design, Serverless functions.
- **Tools & Platforms:** Supabase (Edge Functions), GitHub, Resend API integration.
- **Artificial Intelligence:** Antigravity AI, Google AI Pro, Applied Agentic AI workflows.
- **Specialized Domain Knowledge:** Cryptography, Network Security, Cloud Computing, Distributed Systems, User Interface (UI) Design, Affective Computing, Intellectual Property.

- **Audio & Performance Software:** Cantabile (Performer, Solo, Lite variants).
- **Fintech & Account Management:** Competent in digital transaction platforms and security protocols (e.g., FamApp).

ACADEMIC & INDEPENDENT PROJECTS

MM8 Platform (Minimum Viable Product)

May 2026

- Architected and successfully developed the MVP for the MM8 project.
- Designed the foundational user architecture to support scaling and rapid onboarding.
- Formulated and initiated an aggressive growth and acquisition strategy with a target milestone of 10,000 active users by mid-May 2026.

Full-Stack Portfolio Architecture

April 2026

- Designed, developed, and launched a comprehensive personal portfolio website (aswinsalish.me) to act as a centralized hub for professional and academic endeavors.
- Engineered the backend infrastructure utilizing Supabase, implementing rigorous data schemas and custom Edge Functions.
- Integrated a secure, custom-built contact form using the Resend API to facilitate seamless and reliable client and peer communications.

CERTIFICATIONS & CONTINUOUS LEARNING

- **MATLAB Onramp Certification:** Achieved over 94% completion, demonstrating advanced proficiency in indexing, logical arrays, data plotting, and syntactical logic.
- **NPTEL / SWAYAM Advanced Technical Coursework:** Actively enrolled in and completing specialized technical modules, including:
 - Cryptography and Network Security
 - Cloud Computing and Distributed Systems
 - User Interface Design
 - Affective Computing
 - Intellectual Property
- **Aptitude & Career Readiness:** Enrolled in the All India Naukri Campus Aptitude Test (NCAT) to benchmark and demonstrate industry-ready analytical and problem-solving skills.

CONFERENCES, EXPOS, AND HACKATHONS

- **IEDC District Cluster Level Hackathon:** Selected participant in the district-level competitive hackathon coordinated by the Kerala Startup Mission (March 2026).
- **Drishti 2.0 Project Expo:** Exhibited technical project work and prototypes as part of the Techletics 4.0 technical festival (February 2026).
- **UCL Auction Event:** Official registered participant in regional tactical bidding events (January 2026).

ADMINISTRATIVE EXPERIENCE & EXTRACURRICULAR ACTIVITIES

- **Examination Documentation Management:** Successfully managed documentation, datasheet alignment, and registration protocols for the Kerala Engineering Architecture Medical (KEAM) entrance examination (2025).
- **Live Audio Setup & Performance:** Experienced Yamaha keyboard performer with applied technical knowledge of stage setups, live performance execution, and digital audio workstation (DAW) routing using Cantabile software.
